INLAND FAMILY optometry
Vision & Eye Wellness Center

After your *IPL*

Lumenis IPL · eye & skin care

What's normal

- Mild warmth, redness or puffiness for a few hours
- Temporary blurry vision for up to an hour
- Pigmented spots darken and look like coffee grounds, then flake off in 7–21 days. Don't pick them.
- Dry eye symptoms may fluctuate between sessions

First 48 hours

- Avoid sun. Apply mineral SPF 30+ every 2 hours outdoors.
- No saunas, hot tubs, hard workouts or hot showers on the face for 24 hrs
- Skip makeup for 4–6 hrs and retinols, acids or scrubs for 1 week
- Use a gentle cleanser and moisturizer only
- Keep up your at-home plan: warm, cleanse, hydrate

Call us if

- You have blistering, oozing or worsening pain
- Redness lasts more than 48 hours
- Your vision changes

NEXT SESSION IN ____ WEEKS

After *OptiLIFT*

Muscle stimulation for lids & blink

What's normal

- Slight warmth, tingling or pinkness that fades within an hour
- Mild muscle soreness, like after a workout
- A lighter, more open feeling around the eyes

First 24 hours

- Drink plenty of water
- Makeup and normal skincare are fine the same day
- Avoid facial massage or devices on the treated area

Best results

- Complete all 4 sessions, about 1 week apart
- Pair with IPL for the full dry eye benefit
- Maintenance every 3–6 months

Keep your eyes comfortable

- Warm mask 10–15 min, then lid cleanser
- Preservative-free drops as directed
- Omega-3 daily with a meal
