IS IT DRY EYE?

You don't have to *just live with it.*

Dry eye affects millions of people and is one of the most common reasons patients visit us. If any of these sound familiar, it's time for a dry eye evaluation.

- Burning
- Gritty, sandy feeling
- Redness
- Watery eyes
- Tired eyes
- Blurry vision on screens
- Contact lens discomfort
- Light sensitivity

Common causes

- Screens and less blinking
- Hormones, menopause and aging
- Medications such as antihistamines
- Contact lenses, LASIK and eye makeup
- Rosacea and Demodex mites
- Dry climate, A/C and Santa Ana winds

Take the first step

Ask about our dry eye evaluation. We image your oil glands and tear film to find the cause, not just the symptoms.

DRY EYE CARE

Comfort you can *see* and feel.

Clarity begins here.

UNDERSTANDING DRY EYE

What is *dry eye?*

Dry eye is a **chronic, progressive** condition. Your tears don't keep the front of your eye comfortable and protected, either because you don't make enough or because they evaporate too fast.

In most people the cause is **meibomian gland dysfunction (MGD)**. The tiny oil glands in your eyelids clog, so tears evaporate in seconds.

Why treat it early?

Untreated, inflammation can permanently shrink the oil glands and damage the surface of the eye. Consistent care protects your glands and your vision.

Your dry eye evaluation

- Symptom questionnaire
- Gland imaging (meibography)
- Tear film and lid exam
- A personalized treatment plan

IN-OFFICE TREATMENTS

How we *treat it*

- **OptiLight IPL by Lumenis**
  The first and only IPL FDA-approved for dry eye. Light pulses calm inflammation around the lids so the oil glands can recover, and also calm facial redness and rosacea.
- **TempSure Envi Radiofrequency**
  Gentle radiofrequency warmth melts thickened oils and reopens the eyelid glands. Drug-free and non-invasive with no downtime, with smoother, firmer skin as a bonus.
- **Low-Level Light Therapy**
  Specific wavelengths of light warm the lid glands, reduce inflammation and support cellular repair. Relaxing, mask-based and quick.
- **Amniotic Membrane**
  Hydrated, cryopreserved tissue placed comfortably on the eye in office. Its natural anti-inflammatory properties help the surface of the eye heal.
- **TriLift**
  Dynamic muscle stimulation tones the muscles around the eyes for a fuller blink and a lifted look. No needles and no downtime. 20–30 minute sessions.

More than one approach

Most patients do best with a combination of treatments. Dr. Ferrucci will build the right mix for your eyes. Book online at tolucalakeoptometric.com.

YOUR PLAN

What to *expect*

1. **Evaluate**
   We find the type and cause of your dry eye.
2. **Treat**
   A series of in-office treatments that target the cause.
3. **Maintain**
   A simple daily home routine plus maintenance visits keep results lasting.

At home

- **Warm:** heated eye mask, 10–15 min
- **Cleanse:** lid & lash cleanser
- **Hydrate:** preservative-free drops
- **Nourish:** omega-3 supplement
